Titatnic Dataset

Section	Description
1. Problem Framing	Research questions, formal hypotheses (H0/H1), significance levels
2. Raw Data Inspection	Data loading, structure analysis, column descriptions
3. Missingness Analysis	MCAR/MAR/MNAR detection, missingness patterns, data leakage checks
4. Descriptive Statistics	Stratified analysis by gender, class, age, family size
5. Hypothesis Testing	Chi-square, t-tests (two-tailed & one-tailed), ANOVA with post-hoc
6. Correlation Analysis	Pearson & Spearman correlations, effect sizes, R² interpretation
7. Feature Engineering	FamilySize, IsAlone, FarePerPerson, Title extraction, HasCabin
8. Anomaly Detection	IQR & Z-score methods, outlier analysis for Fare, Age, FamilySize
9. Missing Data Handling	Conditional imputation by Title/Pclass, domain-informed decisions
10. Visualization	12-panel dashboard, statistical storytelling narrative
11. Bias & Ethics	Confounding, selection bias, causation vs correlation, ethical considerations
12. Executive Summary	Key findings, confidence table, recommendations, next steps
